EVIDENCE

We are comparing **Bendroflumethiazide** & **Indapamide** in the most efficient way to find out which is best for treating high blood pressure. This might result in a change to your prescription.

By doing more research we can find out which is the best for everyone. With this type of study there is minimal disruption to you and your GP.

Scan this code to visit the EVIDENCE website

EVIDENCE is a cost-effective way of generating drug safety and effectiveness data for drugs commonly used to treat high blood pressure.

If you would like to be involved in helping shape this type of research study and would like to join our patient involvement group, please get in touch.
